## Education

01/2021 – present  
Sunyani, Ghana

**University of Energy and Natural Resources**  
*Bsc Computer Science*

## Skills

### Backend developer

*Managing server-side of an app with python(Flask), SQLALCHEMY, CORS, Flask migration*

### Frontend developer

*With HTML5, vanilla CSS and JavaScript, I can create a much pleasing website*

### CSS Art

*With vanilla CSS, I can recreate images*

### Problem Solving

*As an introvert, being able to solve technical problem, especially being able to solve a bug in a code gives me a sudden rush. I do this with eagerness to get a job done and consciousness that keeps me focused to the problem at hand.*

### Microsoft Office Suite

*I have fair experience with MsWord, Excel and PowerPoint. As a student, I use them on daily basis for reports, project documentation and presentations*

## Professional Experience

2010 – 2016  
Ghana

### Quiz Contestant

During my primary and junior high school days, I served as quiz contestant, exclusively for ICT, general knowledge, and general science. Winning 3 out of 8, tie of 4, this helped improved my tendency to solve problems.

09/2013 – 07/2014  
Ghana

### Senior School Prefect

As a leader, I helped the school in management of resources, encouraging discipline among students. This instilled cultural-orientation in.

## Certificates

- Python for Beginners
- Python Core
- JavaScript
- C++
- SQL

## Projects

### Project Fyyur

As part of Udacity Full-stack Web development Nanodegree program, I demonstrated my skills in Flask(python framework), Sqlalchemy and flask migration for database management, to develop and maintain the controllers and models endpoints of the MVC of an app, Fyyur

### Trivia App

As part of Udacity Full-stack Web development Nanodegree program, I demonstrated my skills in Flask(python framework), CORS, API development and documentation, to complete an app, Trivia, which generates questions randomly or based on user preferences.
